PRODUCT CARE GUIDE

MICRO CEMENT

Micro Cement is a modern decorative solution rising in popularity for its sleek and sophisticated finish.

It's a polymer-modified cement-based coating that adds a touch of luxury and contemporary design to our furniture pieces. Micro Cement table surfaces offer a robust finish that can withstand the rigors of daily use. They are also easy to clean and maintain and are resistant to stains and spills.

REGULAR MAINTENANCE

CLEANING:

Periodically clean the table with a PH balanced, non-abrasive cleaner and a soft, damp cloth. Make sure the cleaner is suitable for delicate surfaces. Avoid abrasive or acidic cleaners as they can damage the finish. Rinse with water and wipe dry with a clean cloth.

STAIN REMOVAL:

If you spill something on the surface, especially substances like red wine, coffee or oily liquids, clean it up immediately with a soft cloth and mild soap. Do not let the stain sit for an extended period as it may become difficult to remove.

PREVENTING DAMAGE

AVOID EXCESSIVE HEAT:

Do not place hot objects directly on the surface. Always use trivets or heat-resistant pads to protect it from heat-related damage.

AVOID DIRECT SUNLIGHT:

Prolonged exposure to direct sunlight can cause the micro cement finish to fade over time. Consider using curtains or blinds to protect the surface from harsh sunlight.

We trust you will enjoy your Abide Interiors micro cement product for many years to come.
